

# BARRE YASWANTH SATYA NAGA SAI

Hyderabad, India | yaswanthasai0517@gmail.com | +91 8522861447 | [linkedin.com/in/yaswanth-sai-7a599b1a9](https://www.linkedin.com/in/yaswanth-sai-7a599b1a9)

## PROFESSIONAL SUMMARY

---

Software Engineer with 4 years of professional experience designing Python-based ETL pipelines, SQL-driven batch data workflows, and data migration solutions in fintech environments. Skilled in data extraction, data validation, financial and credit-risk calculations, and feature engineering for machine learning pipelines (XGBoost, LightGBM). Experienced with AWS S3, Parquet, FastAPI, Docker, and MLOps-oriented model deployment. Proven track record delivering accurate, scalable, and business-critical data solutions.

## TECHNICAL SKILLS

---

- Implemented UPSERT (insert/update) mechanisms based on loan\_id and customer\_id to ensure idempotent data loads and accurate record updates.
- Developed batch prediction pipelines that load trained ML models and encoder artifacts via pickle, generate inference results, and persist outputs to database tables.
- Implemented JWT-based authentication for Flask APIs to secure internal applications and data services.

## **Software Engineer — NISC Export Services Pvt. Ltd. (NES), Hyderabad**

**Nov 2022 – Jun 2025**

- Developed and maintained Python-based automation scripts for data parsing, transformation, and database updates, improving operational efficiency.
- Designed custom system applications for database migration (MSSQL to MySQL), data mining, and automation using Selenium, reducing manual effort.
- Used Python Tkinter and PyInstaller to package and deploy automation tools for seamless, user-friendly execution.
- Built OCR-based applications to extract text and update highlighted coordinates for image processing and document analysis.
- Optimized database queries and integrated threading into automation workflows, improving performance and responsiveness.
- Created interactive Power BI dashboards to surface actionable insights and track key business metrics.
- Developed web scraping and data mining tools using Selenium and BeautifulSoup to extract, process, and analyze external
